61981

December 22, 1980

Mr. Robert Osmalov
Textile Fibers Department
E. I. Du Pont de Nemours & Company, Inc.
Post Office Box 27001
Richmond, Virginia 23261

Dear Bob:

Thank you for your letter of December 12 and your expressed concerns.

Haiti B/W

In discussions with our International Sales people, they feel that they will be able to get another order from Haiti for Tyvek notes, but believe it will not come until the end of March 1981. We are therefore suggesting that we complete this next run of Tyvek sheets in the same quantity and with the same specifications as the previous run. If we are forced to make an earlier decision to use it elsewhere, the present layout will permit some flexibility to use it for a note design of approximately the same width as the 50 Gourde note and as long as the substitute has a centered portrait.

I agree that we should thoroughly test out any ink we intend using. Inasmuch as it is probable that we will go again with the 50 Gourde, we must find a substitute for the iron blue pigment. In light of the high probable use on the 50 Gourde, are there any other considerations we should evaluate for optimizing a successful run? You might want to discuss this with Tony La Capria.

Again, Bob, many thanks for your cooperation and support. I am truly sorry for this recent set back, but it hasn't dampened my enthusiasm for the use of Tyvek for banknotes.

Please accept my best wishes for a Merry Christmas and a Happy New Year, and would you kindly convey these wishes to all our friends at Du Pont.

Regards,

Sincerely,

S. F. D'Amato
President

INTERNATIONAL DIVISION

M. René Lafontant
Directeur General
Banque de la Republique d'Haiti
Port-au-Prince, Haiti

Dear M. Lafontant:

Please permit me to thank you for receiving me so cordially in your office on December 9, 1980. Your understanding on the matter of a necessary adjustment and a slightly modified delivery schedule is greatly appreciated.

We were fortunate to find a means of shipping the entire balance of the last order in one flight rather than stretching the shipments out over a longer period of time. By the time you receive this letter you should also be in receipt of the December 1980 delivery of the 50 and 100 Gourdes bank notes as we discussed.

As per your instructions, we have forwarded the modified delivery schedule to our agent, who will present it to you.

You have our assurance that every effort will be made to meet the deliveries in the modified schedule, and if possible improve upon them.

Thank you again for your professional understanding in this matter.

Very truly yours,

SUBJECT

BANQUE DE LA REPUBLIQUE D'HAITI

DATE Dec. 16, 1980

to

M. G.N. Léger
Port-au-Prince

Dear Georges:

Enclosed you will find a copy of my thank you note to Mr. René Lafontant for my visit and a copy of the modified schedule we discussed. This schedule represents ready to deliver from the plant. I never did show Mr. Lafontant my copy of the proposed schedule that you and I had. Compare this new modified schedule with the copy I left with you. You will see that it is very close and should be acceptable to the Bank.

Please advise us when you have delivered this new schedule to Mr. Lafontant.

With best wishes

Very truly yours,

LAC/mag

December 11, 1980

TRIP REPORT

Haiti

December 5-10, 1980

There were four purposes:

- B/W*
- 1) Advise the Bank President that there would be no Tyvek bank notes in the current order or the near future.
 - 2) Advise the Bank that the 2.mm 50 and 2.mm 100 Gourdes bank notes would not arrive in December, only a partial shipment of 0.1mm notes of each denomination would arrive on December 22, 1980 and the balance of 1.9 be ready at the end of the first week in January 1981.
 - 3) Try to get the Bank to accept a modified delivery schedule for the balance of the order.
 - 4) To make the Bank aware that a price difference would occur, that the Bank would have to pay, if the old order of bank notes were air shipped.

On the first day of business the ABNCo. resident agent contacted by telephone the Director of the Vaults and Director of International Banking, Mr. Jean Claude Sanon. He was briefed on the change to the existing delivery schedule for the 50 Gourdes bank notes. We wanted him to check his vault inventory for the 50's and 100's, both of which were due in December. We also advised him that there would be no Tyvek printed notes due to technical difficulties, that ABNCo. was dropping the Tyvek idea completely and those Tyvek notes would be printed on conventional paper. We also asked him to please arrange a meeting for me with the Bank President so that I could personally inform him of the above.

Mr. Sanon's reaction was surprise and anger! He said he thought his vaults were practically empty of 50's and 100's. The absence of the 50's would directly affect a project involving the Presidential Palace. He said that he would inventory his vaults and try to get me an interview with the Bank President but doubted the possibility due to the

INTERNATIONAL DIVISION

TRIP REPORT - Haiti - December 5-10, 1980

December 11, 1980
Page 2

President's schedule this week (participating in a Haitian/French economic conference held in Haiti). He was aware of our telex informing the Bank that air shipment of the remaining bank notes from the last order would be at the expense of the Bank; and he would get a confirmation from the administrative office on the matter.

The next day Mr. Sanon called and gave us the following information:

- 1) Ship the old order of bank notes by air at the Bank's expense. Bank would send telex to ABNCo. confirming this.
- 2) He could not arrange a meeting with the Bank President due to his schedule. Further, that it was the opinion of Bank staff members that the President not be told about these matters at this time. They suggested waiting until the 2mm of each the 50's and the 100's had arrived in January 1981 and then we would only have to tell him about Tyvek. They feared that this combination of last minute information might make him so angry that he would cancel the entire order.
- 3) That his vaults had enough 50's and 100's to get them through the holiday season-provided they received the token promised deliveries in December and the balance of 1.9mm for each denomination by the end of the first week in January 1981.

I advised our agent that this would not serve the purpose of my visit and that I would go to the Bank myself and try to see the President. I was able to get Mr. Sanon to receive me. I thanked him for accommodating us on the delivery delays in December. I pointed out that my Company wanted the President advised of the situation right now and not later. Since the President was not physically in the building at that time, he obligingly took me to the office of Mr. Rene Lafontant, the Director General of the Bank.

Mr. Lafontant received me in quiet anger! It became immediately apparent that it was Mr. Lafontant who did not want me to meet the President!

AMERICAN BANK NOTE COMPANY
INTERNATIONAL DIVISION

TRIP REPORT - Haiti - December 5-10, 1980

December 11, 1980
Page 3

Mr. Lafontant began by saying he had just directed a telex to be sent to ABNCo. confirming the fact that the Bank would pay the price for the air shipment of the old notes. He understood that they may have to be in as many as ten shipments. In which case, the Bank wanted the 1's first. He then went to the topic of the non-shipment of 2mm. 50's in December. He said he disliked this very much. I explained why the delay occurred; and what our immediate changes were to the previous plan for 50's and 100's; and that these changes would require slight modifications to the whole shipping plan. He then asked "What does it mean when it says 1.9mm. January 1st week?" He was reading from a sheet of paper in front of him, not from my copy of the proposed delivery chart. He obviously had been briefed by Mr. Sanon, who got the information from our agent. Mr. Lafontant then repeated the information Mr. Sanon had already given us and said "I don't see any problem. We could accept a modified plan as long as you meet your promise for a token shipment of 50's and 100's in December and the completed balance of 1.9mm. for both denominations ready by end of the first week in January 1981 or we will not accept it." I told him it was our intention to do so. Then, as I was taking our proposed new schedule out of my briefcase to go over further details, he said: "Is that the confirmed and completed schedule you have with you? I said I had a proposed schedule and some notes as to how we were trying to improve it. He then stopped me and asked: When are you going home?" I said tomorrow. He said: "Go home and make sure you can complete the modified shipping schedule guaranteeing the modified December shipment and the completed (2.0mm) first week January 1981 shipment. If the first part of your schedule holds firm, we could accept a modified plan. Send me the schedule as soon as you can." He then dismissed that topic and went back to the question of Tyvek and the 50 Gourdes. He said: "Why don't you ship us the first 2mm. by January 1981 and wait until you perfect Tyvek then ship us the other 1mm. notes on Tyvek?" I re-explained that due to technical difficulties we were not going to continue with Tyvek at this time. If, however, the opportunity comes up again, we will offer it to the Bank. He then went to his safe and took out the plastic container with the Tyvek notes we had left behind when we were demonstrating the Tyvek note. He said: "Thomas De La Rue offered to print 4mm. 50's for us on this very

AMERICAN BANK NOTE COMPANY
INTERNATIONAL DIVISION

TRIP REPORT - Haiti - December 5-10, 1980

December 11, 1980
Page 4

same paper, at the same price, and we turned them down. Why? Because of our long-standing relationship with you." I thanked him for his reasoning and decision and said: "But sir, the reason we are not going to print the notes is because of a technical problem. The same technical problem will occur no matter what printing firm attempts to do so." As he put the notes away I asked him what official form would the Bank like for the notification of the cancellation of the Tyvek project. He said that this meeting is only informal and an official letter must be sent because it is a matter of changing a contract, and that he would talk to Mr. Léger about that.

He was about to dismiss me and I said: "Sir, one more question, please. Would you kindly arrange a meeting for me with the President so that I can tell him about Tyvek? He said: "I will tell the President about the Tyvek matter." I thanked him for his understanding on the whole matter and left.

Immediately afterwards I met with our agent in his office and explained my conversations with Mr. Sanon and Mr. Lafontant in the Bank. Our agent said that while I was talking to the Director General the agent had an opportunity to meet the Bank President in another government building. Our agent said that he told the story of Tyvek to the President. His comment was: "I am sorry. That is too bad. I will inform Mr. Lafontant to make the appropriate changes."

I then reminded our agent that the Director General would be in touch with him for the letter of official communication and contractual change. He said he would do so but wanted authorization by telex from ABNCo. New York before sending the official notification. I told him I would inform the appropriate authorities in ABNCo. New York.

Resume

The Bank knows there will be no Tyvek in this order. We need to send our agent a telex authorizing him to send the Bank an official letter amending the contract.

The Bank was upset with the last minute news that they would not receive the 50's and 100's in December. They said they could accept a modified delivery schedule change if the 50's and 100's which are part of a modified delivery change are fulfilled as quoted for December 1980 and January 1981.

AMERICAN BANK NOTE COMPANY
INTERNATIONAL DIVISION

TRIP REPORT - Haiti - December 5-10, 1980

December 11, 1980
Page 5

The Director General used the word could rather than would throughout his discussion on the change to the delivery schedule. However, there is every reason to believe he will. A new confirmed schedule will be sent as soon as possible.

HAITI - VISIT TO NATIONAL BANK

The Bank knows that there will be no Tyvek paper used in the printing of the current bank note order, and all notes will be printed on conventional paper. The Bank's President, Dr. Gerard Martineau, was informed by our resident agent, and I informed the Director General, Mr. Rene Lafontant. The Director General will get in touch with our resident agent to make the contractual amendment.

B/w
The Director General was briefed on the delayed shipment of 50-Gourde and 100-Gourde notes during the month of December. He said that the Bank could live with that fact if ABNCo. ships token quantities of 0.1 mm. notes of each denomination by air on December 22 and we have the balance of 1.9 mm. notes of each denomination ready by the end of the first week in January 1981. Further modified delivery schedule is also dependent on this.

The Bank will pay the difference to have the old order bank notes shipped by air beginning the week of December 15, 1980.

Further details are in my trip report.

Dear Mr. Mc Gehee :

I am in receipt of the engraved cards in my name sent to me by the American Bank Note Company, and wish to express to you my thanks for this courtesy.

B/n

I take the opportunity to tell you how glad I was to meet you and Mr. L. A. Corcoran, jr., at your offices in New York at the beginning of October. I was also pleased to discuss the program of using the new material for bank notes on a trial basis which, I hope, will prove satisfactory for our mutual benefit.

Mr. Edouard Racine, of the BNC, joins me to send to you and to Mr. Corcoran our very best regards.

NOV 12 1980

November 11, 1980

Banque de la République d'Haiti
Port-au-Prince, Haiti

Attention: M. Gérard Martineau
Gouverneur

Gentlemen:

In accordance with our conversations on October 6, 1980, we wish to confirm to the Banque de la République our program for the delivery and testing of the 50 Gourdes notes.

B/W
During December 1980 and January 1981, the American Bank Note Company will deliver to the Banque a quantity of 3 million notes of the 50 Gourdes denomination; 2 million of these notes, Nos. 000001-1000000 and A000001-A1000000, will be printed on traditional bank note paper, and 1 million notes, Nos. B000001-B1000000, will be printed on our new material, "TYVEK".

With the permission of the Banque, American Bank Note Company, in conjunction with Du Pont Laboratories, proposes the following method for testing and evaluating the durability of this new substance in circulation. We recommend that both types of notes be issued simultaneously. If possible, the notes should be mixed, or shuffled, as with playing cards, to insure their dispersal in equal amounts. The serial numbers and date of issue should be recorded when the bank notes are placed into circulation. It would be helpful if the majority of notes could be issued in Port-au-Prince; however, we understand that you may wish to issue notes to other branches. To this end, we would ask that no more than 250,000 TYVEK notes be distributed outside the capital, as this would spoil the controls being placed on the experiment.

If convenient, American Bank Note Company would like to begin examination of the TYVEK notes one month after their being placed in circulation. Further examination should be made at three-month intervals thereafter. We request

AMERICAN BANK NOTE COMPANY
NEW YORK

Banque de la République d'Haiti
Port-au-Prince, Haiti

November 11, 1980
Page 2

that the Banque removes from circulation a total of 100 notes which exhibit the worst wear (50 TYVEK, 50 paper). These notes should be sent to us by courier, at our expense.

The serial numbers and dates of issue should be recorded for each type of note. We would also request that the Banque notify us of the dates of issue and serial numbers for any test notes which are withdrawn from circulation and where applicable, the date of the Banque's destruction of any notes involved in this test.

All notes examined in our offices in New York will be handled in a secure manner and will be promptly returned to the Banque. In cases where a note might be damaged or mutilated during the evaluation process, the American Bank Note Company promises to replace the note with an exact duplicate, printed on TYVEK. In the event that we should have to print a replacement note, we will advise the Banque of the serial number so that it may be noted in your records. The damaged or mutilated note can either be returned to you for destruction or, with your authorization, we can destroy it in New York.

American Bank Note Company should be notified immediately if at any time during the evaluation process the Banque notices that the majority of notes printed on TYVEK are of poor quality.

We would also welcome any comments from the Banque with regard to the appearance of the notes, problems which might arise in the handling of the notes, or any other observations which you may wish to make regarding TYVEK.

Finally, any public notification, such as press releases, will be handled solely by the Banque de la République or an appropriate agency of the Haitian Government.

Very truly yours,

AMERICAN BANK NOTE COMPANY

Addendum to Memorandum on the Evaluation of Haiti-Tyvek Test Dated Sept. 24, 1980

The following sentence will be added to item 7 on page 5.

It would be most advantageous to analyze these withdrawn notes under the same conditions outlined in item 9 (Security) in this paper.

American Bank Note Company
Garrison Ave. & Tiffany St.
New York, N.Y. 10474

September 24, 1980

Subject: Evaluation of Haiti-Tyvek Test

Scope: This paper proposes monitoring and evaluation procedures which are to be used to compare a new bank note substrate to traditional cellulose paper.

1. Delivery

During December, 1980, and January, 1981, 1 million 50 Guorde Tyvek and 2 million 50 Guorde paper bank notes will be delivered to Haiti. Issue of these notes will commence during January, 1981.

2. Distribution

In order to facilitate the monitoring of both notes it is recommended that both types of bank notes be issued simultaneously in equal amounts. The two types of notes can be manually shuffled (such as in playing cards) in equal amounts at the final points of distribution. This will assure adequate dispersion of both types.

3. Territories

In order to insure adequate access to circulating notes the Port au Prince area will be the prime test area; however, at the National Bank's discretion up to (but no more than) 250,000 Tyvek notes may be distributed to outlying areas which experience heavy wear.

American Bank Note Company
Garrison Ave. & Tiffany St.
New York, N.Y. 10474

September 24, 1980

- 2 -

4. Surveillance

In the early stages of the test frequent inspections must be made so that any unforeseen problems do not escape detection. The rate of surveillance is heavily dependent upon the rate of issue. The following schedule is flexible and may be amended depending upon the rate of issue experienced.

0 - Start of issue

Two weeks - After two weeks representatives of ABNCo./du Pont will be present to evaluate early stages of circulation.

One month - 100 samples of each type of note are to be sent to ABNCo., Bronx for evaluation.

Two months - As above

Three months - As above

Every three months thereafter for a projected minimum period of two years

5. Sample Selection

The 100 samples chosen for analysis are to be selected from circulating stock as follows:

American Bank Note Company
Garrison Ave. & Tiffany St.
New York, N.Y. 10474

September 24, 1980

- 3 -

75 at random

25 of worse appearance

Should the occasion arise that the majority of Tyvek bank notes are poor in appearance ABNCo. should be notified.

6. Sample Evaluation

- a. The National Bank is invited to comment on the condition of the bank notes during the test using their criteria.

What is their criteria?

- b. The evaluations made by ABNCo./du Pont personnel are to be made as follows:

- The serial number of each sample examined is to be recorded with the data obtained.

- The general appearance of the sample is to be recorded as follows:

- | | |
|------------------|--------------------------------------|
| A - Excellent | - New, uncirculated |
| B - Good | - New, circulated |
| C - Fair | - Circulated, well used |
| D - Acceptable | - Beginning to exhibit signs of wear |
| E - Unacceptable | - Worn |

American Bank Note Company
Garrison Ave. & Tiffany St.
New York, N.Y. 10474

September 24, 1980

- 4 -

A set of references will have to be developed before the actual evaluation.

- Each specimen is to be graphically divided into three equal segments (left to right) on the face and back. Each segment will be identified as Face Left (FL), Face Center (FC) etc. Within each zone the following characteristics will be noted.

Cleanliness

Stains

Creases

Wrinkles/Cockling —

Tears - Edge

Ruptures

Delamination

Pilling

Stiffness - (Clark or Taber)

Printing (Surface)

- decrease in color intensity
- line breaks

Printing (Intaglio)

- decrease in color intensity
- line breaks

American Bank Note Company
Garrison Ave. & Tiffany St.
New York, N.Y. 10474

September 24, 1980

- 5 -

A simple yes/no response will be recorded wherever instrumentation is not used.

7. Rejects

The National Bank will notify ABNCo. of the destruction or withdrawal of any notes included within this test (both types of stock).

8. Numbering

- The two different stocks will be numbered, if possible, with different prefixes to aid in identification.
- To aid in differentiation between previously issued cellulose notes and the current cellulose (control) notes an additional mark or symbol in the numbering should be used.
- A record of the serial numbers released for issue must be kept by the National Bank with copies available to ABNCo.

9. Security

All notes examined in the Bronx will be handled in a secure manner and promptly returned to the National Bank undamaged by the evaluation.

American Bank Note Company
Garrison Ave. & Tiffany St.
New York, N.Y. 10474

September 24, 1980

- 6 -

10. Publicity

Any public notification such as press releases, will be handled solely by the National Bank or appropriate Haitian governmental agency.

August 22, 1980 Port-au-Prince

Dear M. Léger,

Enclosed please find one (1) face and one (1) back die proof for the 50 Gourdes note. This proof incorporates the changes in the legal text and the signature titles requested by the Banque. Please see that the appropriate official at the Banque signs his approval of these changes on the border of the proofs.

For your information and to recap the current status of this order, our delivery promise at this time still stands at 2 million notes, on paper, ready for delivery in December and 1 million notes, on ~~✓~~TYVEK, ready in January '81. If at all possible, we will try and improve on this schedule, however it seems doubtful at this time that we will be able to do this.

Port-au-Prince
Haïti

Dear M. Léger:

You will find herewith one die proof of the face and one of the back, of the 100 Gourdes note of the Bank's current order.

As the purpose of these proofs is to demonstrate the changes made in the steel impression, the lithographic printing of the note is not shown.

We also enclose a proof printed on yellow cardboard with a plastic overlay, showing the signatures to be printed.

We shall very much appreciate your having the Bank signify its approval by signing each of the three enclosed proofs.

Kindly return the approved proofs to us as soon as possible.

B/n
Also, please find out if we need to send to the Bank for its approval, proofs of each of the 1, 2, 5 and 50 denominations; since, as you know, the changes made and the signatures are common to all the denominations ordered.

Very truly yours,

María A. Brugal

JUN - 1 1980

6/25/80

To: L.O.M.

Georges Leger phoned today to ask the following:

1. Do we have any other material on counterfeiting which we can give the Banque ?
2. If his commission had been paid.
3. If we had any specimen notes from the new order showing the new signatures.

I told him that as far as I knew:

1. We didn't have any other information of counterfeiting other than the brochures which we have already sent down to the Banque.
2. His commission would be paid the week of June 30th.
3. We had no specimen notes ready at this time to give the Banque, but I assured him that the new notes would have the correct signatures on them.

I also asked him if he had any information for us regarding the notes we are now holding in storage. He said that the Banque had recently bought a new incinerator from a European company but that it was not working properly so that all the vault space they had in the Banque was being used to store old notes awaiting cremation. Therefore, he didn't think that the Banque would ask for the notes very soon.

Leger phoned while he was in New York, with M. Lafontant. They were returning to Port-au-Prince over the weekend.

Dear Owen:

B/W

The bearer, Gilbert Léger, will deliver the approved models of the bank notes, for Banque de la République d'Haïti, with the approved new wording. However please note that the signatures should be those of "Antonio André, Gouverneur", "Edouard Racine, Gouverneur Adjoint" and "René Lafontant, Directeur Général", as per specimen already submitted.

Mr. Lafontant has received your statement for the bank notes still in storage and part of the old order. He informed me that the statement would be sent immediately to the accounting department for processing.

Very truly yours,

Georges N. Léger, Jr.

JUN 3 - 1980

Att: M. René Lafontant

Gentlemen,

B/N
[Handwritten signature]
Enclosed please find five (5) models, one each of the following denominations: 1, 2, 5, 50 and 100 Gourdes, showing the revisions which have been made to the legal text on the back of the notes, the change in the Banque's title and the change in the signature titles. We would greatly appreciate it if you would sign each of the enclosed models, indicating that you approve of the corrections, and then return them to us as soon as possible.

We would like to call your attention to the fact that the serial numbers on the models are not fluorescent, however they will fluoresce under ultra violet light on the actual notes.

Per your request to our representative, M. Georges Leger, we are also enclosing a duplicate copy of our bill, in triplicate, No. B29187 in the amount of U.S.\$241,120.00. This bill covers 10,000,000 notes of the 1 Gourde and 6,000,000 notes of the 5 Gourdes denominations being held in our security storage in New York, pending shipment to Port-au-Prince.

Very truly yours,

Encls.

Dear M. Lafontant:

In accordance with our proposal, we are sending the Banque six ultraviolet lamps which we hope will meet with your complete satisfaction. This morning a telex was sent advising the shipping details.

With regard to the new order for bank notes, I especially wish to thank you for your confidence in our products and services. As mentioned in our telex, please send us your instructions confirming signatures, numbers, and series as soon as possible so that we can enter production orders at our plant without delay.

As we reported in my letter to M. Racine of May 7, we have ready for shipment 10,000,000 notes of the 1 Gourde denomination and 6,000,000 notes of the 5 Gourdes denomination, which we would like your permission to ship on the next available ocean freighter. The total invoice value is US\$241,120.00. Would you please advise us on this matter as soon as possible.

Again, please accept our appreciation for the Banque's valued order, which will receive our most careful attention.

Very truly yours,

To Owen Mc Gehee from J. Campo
Re: Fluorescent numbering inks for
Haiti banknotes:

Here are some prints of
the fluorescent numbering inks
which I propose to use on
the above mentioned banknotes.
The fluorescent numbering red has
previously been used on Venezuela
banknotes and should not cause
any production problems. The fluorescent
numbering blue has never been used
in production and should be tested
as to press properties if the color
should be acceptable to you.

If color is O.K. I will
make up small quantities of
this ink and run a press trial
in Finishing Dept and advise
you of the results.

4/30/80

Mr. L. Owen McGehee
Senior Vice President
International Division

At 10:15 a.m. on April 24, 1980 I called and spoke to our agent in Haiti, Georges Léger.

He said that he had prepared a letter offering our adjusted price, CIF., etc., and that he would deliver it to the Bank today. He said we could expect a telex from the Bank tomorrow (April 25, 1980).

The question of the models we left behind is another story. As mentioned in your note 4-23-80, he said he had the models for the 50 and 100 Gourdes notes, but was missing the models for the 1, 2, and 5. He reaffirmed this fact in our discussion today.

During our conversation with Georges on April 23, 1980, you asked me if I had the models, or if not, where was the last place I remembered seeing them. I quickly checked my desk and briefcase and was certain that I did not have the models. I told you this and said I remembered seeing the models on Mr. Andre's desk.

Later yesterday, with more time to think about the subject, I reconstructed our last day at the Bank and with Georges. We had the models in that red cardboard box in Mr. Racine's office on that last day. Later, when we were in Georges' office we left the box with the models on top of Georges' desk. (Facing the desk, front right side). Remember we had to move around a lot of the excess papers and paraphernalia Georges had on his desk top. We left the models so that he could submit them along with our letter of offer to the Bank.

Talking to Georges today, he said he has the red box, but only two of the models (50 and 100 Gourdes). He has had them in his safe since we left. I explained that we did not bring them back since there would be no reason for that and suggest that he recheck his office. If necessary, we suggested that he discreetly and diplomatically check with the Bank to see if they have the models. He said he would, but was not optimistic that the Bank had them.

AMERICAN BANK NOTE COMPANY
INTERNATIONAL DIVISION

Page 2

12/5 - Found in files in N.Y. Low

It is difficult to say where the models are, but it is quite certain they are not here in New York. You may remember while we were in Haiti we tried to locate the 25 Gourdes model you showed a few years ago. Georges admitted that it must be in his office since neither the Bank nor ourselves had it. Nevertheless, he could not find the model.

Remember there are no new design changes, only the rewording in the text of the bank note.

Jim Clarendon participated in my discussion with Georges on April 24, 1980.

Mr. McGehee:

M. Georges Léger called.

He has just written a letter to the Bank confirming the price. They Bank will get in touch with us by telex, probably tomorrow.

He has located in his safe 50 G. and 100 G. models, but there is no other one. Messrs. Andre, Racine, and Martineau believe that somebody picked up the other model, either you or LAC.

Please call him tomorrow.

CABLE ADDRESS "BANKNOTE" NEW YORK

INTERNATIONAL DIVISION

March 17, 1980

L. J. S.

APR 10 1980

Banque de la République d'Haiti
Port-au-Prince, Haiti

Gentlemen:

With regard to our recent conversations and your request dated March 7, 1980 for our proposal to supply a total of 76 million bank notes divided among five denominations, we are pleased to present for your consideration the following offer:

In accordance with the Banque's instructions for the 1, 2, 5, 50, and 100 Gourdes denominations, we will show the new title of your Institution and the legal text which appears under the national Coat-of-Arms on the reverse, as per text submitted in your letter. In all other respects the notes will appear as on previous issues of our manufacture.

In accordance with your request, our price quotation, which includes the printing and finishing charges, the preparation of the new front and back plates, and our customary Tri-Wall packing, is as follows, (FOB Plant New York):

1 Gourde	20 million	US\$ 605,200 - 30.26
2 Gourdes	10 million	322,200 - 32.22
5 Gourdes	40 million	1,608,000 - 40.20
50 Gourdes	3 million	170,100 - 56.70
100 Gourdes	3 million	170,100 - 56.70
	76 million	US\$2,875,600 - (37.83)

Payment is to be made against certificates of manufacturing or shipping invoices.

AMERICAN BANK NOTE COMPANY
NEW YORK

Banque de la République d'Haiti
Port-au-Prince, Haiti

March 17, 1980
Page 2

With respect to delivery of the order and pursuant to our conversations, we understand that priority is to be given to the 100 Gourdes and the 50 Gourdes denominations. Accordingly, our estimated delivery program is as follows:

100 Gourdes: 2 million notes - August, 1980;
1 million notes - October, 1980.

50 Gourdes: (Regular Paper) - 1 million notes - August, 1980;
1 million notes - November, 1980.

50 Gourdes: (New Material) - 1 million notes - October, 1980.

With respect to the remaining denominations, we understand that the Banque has asked that the 40 million notes of 5 Gourdes should be printed first, followed by the 1 Gourde and 2 Gourdes denominations. Our best delivery estimate for these denominations is as follows:

5 Gourdes: 4 million notes per month from October, 1980
through July, 1981.

1 Gourde: 4 million notes per month from December, 1980
through April, 1981.

2 Gourdes: 2 million notes per month from December, 1980
through April, 1981.

In addition, the Banque has instructed us to start these new issues with new serial numbers. The numbers will be imprinted on all denominations of bank notes as they now appear, but in order to give the Banque additional security, some special fluorescent material will be added to the ink so that under ultraviolet light the note itself will not appear, while the numbers will glow. We also understand that we are to print three signatures as follows: Antonio André, Gouverneur, Edouard Racine, Gouverneur-Adjoint, and René Lafontant, Directeur Général.

As regards the 50 Gourdes notes and as a unique part of our proposal, without additional charge, we offer to prepare 1,000,000 bank notes of this 50 Gourdes denomination on a new highly durable material which has been developed for security printing, and 2,000,000 bank notes utilizing the

AMERICAN BANK NOTE COMPANY
NEW YORK

Banque de la République d'Haiti
Port-au-Prince, Haiti

March 17, 1980
Page 3

traditional high quality security paper exactly the same in all respects as we have previously supplied to Banque Nationale de la République d'Haiti.

We are pleased to advise you that, together with E. I. Du Pont de Nemours, American Bank Note Company has developed this patented material. The unique properties of this spun-bonded material make it ideal for maximum use bank notes, circulating in highly contrasting climatic conditions.

The physical testing characteristics of our new material are truly outstanding -- at Du Pont and American Bank Note laboratories, the results have been such that we can guarantee the double fold characteristics of this new material will more than triple the life extension of the existing bank notes on conventional paper.

This new material has been successfully tested on our printing equipment. Because it is also an essentially fibrous material, the printing reproductions are of the highest quality, as you will see on the enclosed specimen, with no discernible differences from images printed on conventional bank note security paper. These results portend for the future an important breakthrough in cost effectiveness and economy in the use of bank notes. In the future, the Banque will realize a substantial long-term saving if all notes are printed on this material, thereby reducing the number and quantity of reprint orders.

Because this new material has not yet been introduced into other world markets, we propose to enter into a joint evaluation project with Banque de la République d'Haiti to evaluate the durability of this new material in actual circulation, this test to be made at no additional cost to the Banque. We fully guarantee the security quality of this new product. Any notes printed on our new material which do not last at least as long as those notes printed on paper will be replaced by us at no cost to the Banque.

If the above proposal is acceptable, we will arrange for periodic visits to the Banque by our technical specialists to confer with the Banque's officials once the notes have been placed into circulation.

Gentlemen:

Per your recent conversations with our Mr. L. Owen McGehee,
we herewith enclose a copy of our bill, No. B-29187, in
triplicate, in the amount of U.S.\$241,120.00.

This bill covers the notes indicated, which have been
held in Security Storage in our Bronx Plant.

At your convenience, we would greatly appreciate it if
you would give us some indication as to when you would
like these notes shipped.

We thank you for your kind attention to this matter and
remain,

Very truly yours,

MAR 26 1980

3/24/80
L. Owen

Dear Mr. McGehee:

Further to our recent conversation, we hereby ask you to kindly send us at your earliest convenience your best price quotations and delivery schedule for shipments by either air cargo in strong water proof cartons or by boat freight in wooden case of the following order of haitian banknotes:

20,000,000 notes of 1 Gourde
10,000,000 notes of 2 Gourdes
40,000,000 notes of 5 Gourdes
3,000,000 notes of 50 Gourdes
3,000,000 notes of 100 Gourdes

TOTAL 76,000,000 banknotes

The notes should be similar, in size, colors, design and high grade paper, to those previously printed except that the signatures are to be replaced according to the new signatures specimens submitted.

To fulfil our immediate needs, we would require shipment, by July 1980 at the latest, of the 50 Gourdes and 100 Gourdes denominations.

.../ See 3/17/80

MAR 24 10 59 AM '80

INT'L DIV.
A. B. N. CO.

Mr. McGehee
Page 2

Also the order of 5 Gourdes banknotes will be needed around September 1980.

The new wording which must appear in french on the back of all haitian banknotes is the following:

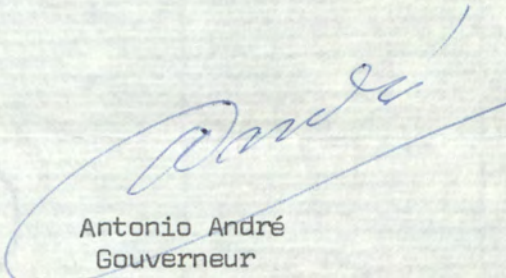

"Ce billet, émis par la Banque de la République d'Haiti en vertu de l'article 149 de la Constitution et conformément à la loi du 17 Août 1979 (Article 2 - paragraphe 9) est payable au porteur en monnaie légale des Etat-Unis d'Amérique au taux de Cinq Gourdes pour Un dollar."

In view of the quantity of notes and their distribution by denomination we hope that you will find it possible to grant us a volume discount.

Should you require any further details, please do not hesitate to contact us.

Best regards,

Very truly yours,

Antonio André
Gouverneur

Re: Banque de la République
d'Haiti

We will be making a proposal to the Banque within the next few days and we would like to have a delivery promise from the Bronx for the following:

50 Gourdes - 2,000,000 notes
100 " - 1,000,000 "
5 " - 30,000,000 "

The Banque has requested that we begin delivery of the above notes in October, 1980.

1 Gourde - 30,000,000 notes
2 Gourdes - 10,000,000 "

The Banque has asked that we begin delivery of these notes in December, 1980.

Please let us have your production schedule as soon as possible.

Jim Harty

L. U. S.
APR 10 1980

Face: 1) Delete word "Nationale" from Bank's title at top border of note.

- 2) Delete signature titles.
Engrave following new signature titles, from left to right:

Le Gouverneur
Le Gouverneur Adjoint
Le Directeur (in lieu of Le President,
Le Directeur,
Un Administrateur).

Back: 1) Delete word "Nationale" from Bank's title at top

- and
2) from Bank's title in legal legend at bottom.

Alterations

1, 2, and 5 Gourdes Denominations

In addition to above alterations, these denominations will require a new steel engraved vignette (subject to be determined) to replace the current vignette on face.

For modeling purposes of these three denominations, cut out existing portrait vignette from the specimens.

GENERAL REMARKS

AMERICAN BANK NOTE COMPANY
INTERNATIONAL DIVISION

January 18, 1980

Alterations

50 and 100 Gourdes Denominations

Face: 1) Delete word "Nationale" from Bank's title at top border of note.

- 2) Delete signature titles.
Engrave following new signature titles, from left to right:

Le Gouverneur
Le Gouverneur Adjoint
Le Directeur (in lieu of Le President,
Le Directeur,
Un Administrateur).

Back: 1) Delete word "Nationale" from Bank's title at top

- and
2) from Bank's title in legal legend at bottom.

Alterations

1, 2, and 5 Gourdes Denominations

In addition to above alterations, these denominations will require a new steel engraved vignette (subject to be determined) to replace the current vignette on face.

Mr. Owen McGehee
American Bank Note Company
70 Broad Street
New York, N. Y. 10004

Dear Owen:

Belated thanks for your good wishes which I heartily reciprocate.

I had an interesting meeting today with the new Assistant Governor of the Banque de la République d'Haïti, Mr. Edouard Racine, and with Mr. Lafontant, the new General Manager of that Institution.

Mr. Lafontant who in some respect has taken over the responsibilities of Mr. Bonnefil, ~~is~~ positive that they will need by the year's end new 100 gourdes and fifty gourdes bank notes and, some time next year, they will require 25 gourdes, 2 gourdes and possibly 5 gourdes notes.

Inasmuch as the Central Bank's period of adjustment will terminate on March 30th of this year, they are still reluctant to commit themselves fully. As a matter of fact, just to give you an idea of some of their problems, they wish to physically separate from the "Banque de Credit" so that there can be no confusion in the public's mind on the different and supervisory role of the Central Bank.

At any rate, and unless something drastic would occur, we still have excellent chances of getting next order as I have not even heard a competitor's name mentioned. It is therefore necessary that in the best possible time limit we submit an amended maquette of all denominations as well as a model of the 25 gourdes note which was not included in the last order.

The following change should be made:

On the front side of the note, where usually somebody's picture appears, the wording should be: "Banque de la République d'Haïti", with the only word "Nationale" being deleted.

The words above the signatures should read, from left to right: "Le Gouverneur", "Le Gouverneur Adjoint", "Le Directeur"; in lieu of "Le Président", "Le Directeur", "Un Administrateur".

On the reverse side, the small print under the denomination in letters should be amended to read: "Ce billet émis par la Banque de la République d'Haïti", by deleting again the word "Nationale".

Mr. Owen McGehee
American Bank Note
Page 2
January 11, 1980

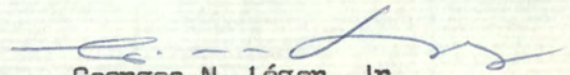

No other change should be made in the larger denomination bank notes, but please note that on the 5 gourdes and 2 gourdes and also 1 gourde bank notes, the effigy of the late President Duvalier should be deleted until further notice. The Central Bank does not know yet what effigy if any will appear on these bank notes.

If at all feasible, I would suggest that a pro forma quotation, obviously not binding, be submitted by taking as basis a duplication of last order with respect to the 5 gourdes and 50 gourdes and 100 gourdes, and the original order for the larger denominations. Obviously your quotation will be subject to negotiation.

I am having this letter mailed from New York and will be available should you need any confirmation by telephone.

With best regards,

Sincerely,

Georges N. Léger, Jr.

GNLJr/lb
